TARGET SUMMARY

Customer-facing founder-builder with deep education, account analytics, sales enablement, and AI-assisted product implementation experience. Built Sip Studies as a practical AI-enabled learning and terminology product while maintaining a decade-long record of customer, supplier, and stakeholder enablement in wine and spirits. For AI Success, the through-line is translating messy workflows into adoption roadmaps, technical readiness plans, workshops, KPI baselines, and value-realization evidence.

ROLE-ALIGNED STRENGTHS

- Translates account and customer workflows into adoption plans, readiness checklists, KPI baselines, and enablement artifacts.
- Uses AI-assisted product building and repo-driven agent workflows to turn ambiguous use cases into reviewable prototypes, documentation, and operating checklists.
- Keeps AI use honest: AI accelerates exploration and implementation while Jonathan owns problem framing, prompts, review, testing, documentation, customer interpretation, and final behavior.
- Combines hands-on technical product building with long-running customer-facing sales and education responsibilities.
- Can map ambiguous workflows into structured adoption plans, training materials, metrics, and operating rhythms.
- Has quantified business impact: 3,500+ placements and a $2.291M wine revenue lift at Lee's Liquor.
- Built platform work touching auth, paid access, Supabase, Edge Functions, AI/news routing, validation, and documentation through AI-assisted development workflows.
- Experienced at making complex product concepts useful to executives, managers, customers, and learners.

AI-ASSISTED BUILD METHOD

- I use AI-assisted product building to prototype workflows, clarify customer value, and turn ambiguous use cases into reviewable artifacts.
- The human-owned build process stays explicit: problem framing, prompts, implementation review, validation, documentation, customer interpretation, and final behavior.
- Every reviewable project should separate what AI accelerated from what Jonathan decided, tested, accepted, or rejected.
- Beverage, education, sales, and events are the base layer for customer workflow translation, trust building, and adoption behavior.
