OpenAI Hiring Team

Re: Product Marketing Manager, Codex

Dear OpenAI Hiring Team,

I am applying for the Product Marketing Manager, Codex role. I am based in Las Vegas and prefer a Remote US role, with regular travel to San Francisco when useful.

This is a stretch role, but I would position myself around practical builder credibility, Codex workflow storytelling, sales enablement, and the ability to translate technical work into adoption-focused narratives.

My strongest Codex evidence is Sip Studies and Sipopedia: a self-directed, AI-assisted product build spanning learning, tasting, maps, terminology, AI/news routing, events, and paid access. I used advanced prompting, durable goals/threads, and repo-driven agent workflows to turn ambiguous product ideas into working artifacts, then reviewed the outputs through documentation, validation scripts, and customer-facing interpretation. That is directly relevant to Codex roles that need useful examples, workflow guidance, technical storytelling, and honest feedback from hands-on use.

Before Sip Studies, I built more than a decade of customer-facing sales, education, and account-analytics experience. At Breakthru Beverage Group, I built and maintain weekly Critical On Hand / Gap Analysis workbooks that evaluate customer POD gaps, on-hand inventory, days on hand, sales movement, incentives, and account opportunities. I also expanded 3,500+ placements and contributed to a $2.291M wine revenue lift within Lee’s Liquor. At AARP Colorado, I led live and recorded virtual education for adults across all 50 states. At Total Wine & More, I wrote curriculum, taught customers, and trained staff. That background matters because AI adoption is not only a technical problem. It requires trust, clear examples, stakeholder alignment, and a path from first use to durable behavior change.

I would bring OpenAI a practical builder’s mindset: understand the workflow, build the example, teach the pattern, measure whether it works, and feed the learning back into the product or program. I am comfortable moving between hands-on product detail, customer enablement, executive framing, and careful documentation.

Thank you for considering my application. I would welcome the chance to discuss how I can bring practical AI-assisted building, customer-facing education, and evidence-driven communication to OpenAI’s Codex positioning, launch, and adoption goals.

Sincerely,

Jonathan Yu
