OpenAI Hiring Team

Re: Customer Education, Learning Experience & Curriculum Lead

Dear OpenAI Hiring Team,

I am applying for the Customer Education, Learning Experience & Curriculum Lead role. I am based in Las Vegas and open to discussing San Francisco only if the role economics and career fit make relocation responsible.

The role is the cleanest match between my work and OpenAI's needs: building learning pathways, writing curriculum, defining assessments, creating production standards, using AI throughout course work, and measuring whether education changes behavior.

My strongest evidence is Sip Studies and Sipopedia: a self-directed, AI-assisted product build spanning learning, tasting, maps, terminology, AI/news routing, events, and paid access. I used advanced prompting, durable goals/threads, and repo-driven agent workflows to turn ambiguous product ideas into working artifacts, then reviewed the outputs through documentation, validation scripts, and customer-facing interpretation. That matters because the OpenAI roles I am targeting require more than AI enthusiasm; they require building useful adoption materials, explaining tradeoffs, and proving behavior change.

Before Sip Studies, I built more than a decade of customer-facing sales, education, and account-analytics experience. At Breakthru Beverage Group, I built and maintain weekly Critical On Hand / Gap Analysis workbooks that evaluate customer POD gaps, on-hand inventory, days on hand, sales movement, incentives, and account opportunities. I also expanded 3,500+ placements and contributed to a $2.291M wine revenue lift within Lee's Liquor. At AARP Colorado, I led live and recorded virtual education for adults across all 50 states. At Total Wine & More, I wrote curriculum, taught customers, and trained staff. That background matters because AI adoption is not only a technical problem. It requires trust, clear examples, stakeholder alignment, and a path from first use to durable behavior change.

I would bring OpenAI a practical builder's mindset: understand the workflow, build the example, teach the pattern, measure whether it works, and feed the learning back into the product or program. I am comfortable moving between hands-on product detail, customer enablement, executive framing, and careful documentation.

Thank you for considering my application. I would welcome the chance to discuss how I can bring practical AI-assisted building, customer-facing education, and evidence-driven communication to OpenAI's AI learning, curriculum, and adoption goals.

Sincerely,

Jonathan Yu
