OpenAI Hiring Team

Re: AI Deployment Manager - Core Ecosystem, EDU

Dear OpenAI Hiring Team,

I am applying for the AI Deployment Manager - Core Ecosystem, EDU role. I am based in Las Vegas and open to discussing San Francisco only if the role economics and career fit make relocation responsible.

I am drawn to the EDU Deployment Manager role because it sits at the same intersection I have been building toward: AI literacy, practical learning workflows, live enablement, and measurable adoption across an institution.

My strongest evidence is Sip Studies and Sipopedia: a self-directed, AI-assisted product build spanning learning, tasting, maps, terminology, AI/news routing, events, and paid access. I used advanced prompting, durable goals/threads, and repo-driven agent workflows to turn ambiguous product ideas into working artifacts, then reviewed the outputs through documentation, validation scripts, and customer-facing interpretation. That matters because the OpenAI roles I am targeting require more than AI enthusiasm; they require building useful adoption materials, explaining tradeoffs, and proving behavior change.

Before Sip Studies, I built more than a decade of customer-facing sales, education, and account-analytics experience. At Breakthru Beverage Group, I built and maintain weekly Critical On Hand / Gap Analysis workbooks that evaluate customer POD gaps, on-hand inventory, days on hand, sales movement, incentives, and account opportunities. I also expanded 3,500+ placements and contributed to a $2.291M wine revenue lift within Lee’s Liquor. At AARP Colorado, I led live and recorded virtual education for adults across all 50 states. At Total Wine & More, I wrote curriculum, taught customers, and trained staff. That background matters because AI adoption is not only a technical problem. It requires trust, clear examples, stakeholder alignment, and a path from first use to durable behavior change.

I would bring OpenAI a practical builder’s mindset: understand the workflow, build the example, teach the pattern, measure whether it works, and feed the learning back into the product or program. I am comfortable moving between hands-on product detail, customer enablement, executive framing, and careful documentation.

Thank you for considering my application. I would welcome the chance to discuss how I can bring practical AI-assisted building, customer-facing education, and evidence-driven communication to OpenAI’s EDU deployment, AI literacy, and campus adoption goals.

Sincerely,

Jonathan Yu
