OpenAI Application Target Results

Prepared for: Jonathan Yu

Prepared: June 2, 2026

Las Vegas, NV | JonYu3@gmail.com | 617.637.0668 | SipStudies.com | Sipopedia.com

RECOMMENDATION

Best application priority with remote work as a major condition: AI Deployment Engineer-Codex.

Second remote priority: AI Success Engineer - US Remote.

Strongest non-remote qualification match: Customer Education, Learning Experience & Curriculum Lead.

The application packets below preserve both paths: a remote-first route that protects Las Vegas stability, and a non-remote route only if the role economics and career upside justify San Francisco.

RANKED APPLICATION TARGETS

1. AI Deployment Engineer - Codex

Team: Technical Success

Location: Remote - US

Compensation: $197K-$278K + equity

Posting: https://openai.com/careers/ai-deployment-engineer-codex-remote-us/

Best remote-first fit; strongest match for hands-on AI coding workflows, demos, technical workshops, and customer enablement.

Posting signals:

- OpenAI describes this role as helping customers adopt coding tools throughout the software development lifecycle.
- The posting emphasizes demos, reference implementations, workflow automations, workshops, technical content, customer feedback, and Codex-powered prototyping.

Resume alignment:

- Built and iterated a full-stack application with AI/news routing, terminology workflows, paid access, validation scripts, and product documentation.
- Uses AI-assisted coding and documentation workflows to turn ambiguous requirements into demos, artifacts, and operational runbooks.
- Can translate technical workflow changes into approachable training for non-technical, semi-technical, and technical audiences.
- Has customer-facing sales, enablement, and education experience across beverage, retail, distributor, and virtual learning contexts.

2. AI Success Engineer

Team: AI Success

Location: Remote - US

Role Match Results | OpenAI application packet
Las Vegas, NV | JonYu3@gmail.com | 617.637.0668 | SipStudies.com | Sipopedia.com

Compensation: $234K-$260K + equity

Posting: https://openai.com/careers/ai-success-engineer-us-remote-remote-us/

Strong remote option; good match for adoption, customer enablement, KPI framing, and technical-business translation, with enterprise technical depth as the main stretch.

Posting signals:

- OpenAI describes this role as the primary post-sales point of contact for important customers.
- The posting emphasizes technical relationship ownership, adoption roadmaps, workflow mapping, configuration, KPI definition, value realization, and customer enablement.

Resume alignment:

- Combines hands-on technical product building with long-running customer-facing sales and education responsibilities.
- Can map ambiguous workflows into structured adoption plans, training materials, metrics, and operating rhythms.
- Has quantified business impact: 3,500+ placements and a $2.291M wine revenue lift at Lee's Liquor.
- Built platform systems touching auth, paid access, Supabase, Edge Functions, AI/news routing, validation, and documentation.

3. Product Marketing Manager, Codex

Team: Marketing

Location: Remote - US with regular travel to San Francisco

Compensation: $227K-$315K + equity

Posting: https://openai.com/careers/product-marketing-manager-codex-remote-us/

Remote stretch option; credible on technical narratives and adoption content, but the 14+ years developer-marketing requirement is the main gap.

Posting signals:

- OpenAI describes this role as driving adoption and growth for Codex through developer-facing positioning and launch work.
- The posting emphasizes developer workflows, Codex messaging, launch content, technical narratives, sales enablement, developer research, and adoption metrics.

Resume alignment:

- Built and explained technical product systems across AI/news routing, content operations, terminology, auth/paywall, and learning workflows.
- Can convert complex domain workflows into clear messaging, guides, demos, and enablement materials.
- Has practical sales enablement experience from Breakthru and Total Wine, plus education content experience through AARP and Sip Studies.
- Understands how users discover, evaluate, learn, and repeatedly use tools when behavior change is required.

4. Customer Education, Learning Experience & Curriculum Lead

Team: GTM Readiness

Location: San Francisco

Compensation: $207K-$230K + equity

Jonathan Yu
Role Match Results | OpenAI application packet
Las Vegas, NV | JonYu3@gmail.com | 617.637.0668 | SipStudies.com | Sipopedia.com

Posting:
https://openai.com/careers/customer-education-learning-experience-and-curriculum-lead-san-francisco/

Strongest non-remote qualification match; excellent education, curriculum, assessment, and AI-learning systems fit if San Francisco becomes realistic.

Posting signals:

- OpenAI describes this role as owning strategy and execution for enterprise learning pathways and curriculum.
- The posting emphasizes curriculum writing, assessments, credential structure, AI-assisted course production, analytics, and alignment with Product and Technical Success.

Resume alignment:

- Designed and shipped modular learning experiences across Sip Academy, Sipopedia, Beverage Quiz, maps, flavor tools, tasting journals, news workflows, and event surfaces.
- Built a 20,000-row terminology and learning-content pipeline with review metadata, citations, source links, batch IDs, and import-ready structure.
- Created education operations patterns: editorial automation, source review, QA checks, validation scripts, standards, and durable documentation.
- Taught live and recorded adult education through AARP Colorado and built customer/staff training materials at Total Wine & More.

5. AI Deployment Manager - Core Ecosystem, EDU

Team: Technical Success

Location: San Francisco and New York City

Compensation: $162K-$230K + equity

Posting: https://openai.com/careers/ai-deployment-manager-core-ecosystem-edu-san-francisco/

Excellent education and adoption match; location is hybrid SF/NYC rather than remote.

Posting signals:

- OpenAI describes this as a specialist post-sales enablement role for educational institutions.
- The posting emphasizes AI literacy, campus-wide adoption, live workshops, adoption interventions, enablement assets, playbooks, and product feedback loops.

Resume alignment:

- Designed education surfaces and learning assets for a full-stack AI-enabled platform.
- Led live and recorded virtual education for adults across all 50 states through AARP Colorado.
- Built terminology, maps, quizzes, journals, and AI/news workflows that convert domain knowledge into practical learning.
- Can facilitate workshops for non-technical, practitioner, and leadership audiences.

6. Deployed Product Manager, Codex

Team: Codex - Engineering

Location: San Francisco

Compensation: $250K-$330K + equity

Posting: https://openai.com/careers/deployed-product-manager-codex-san-francisco/

Strong founder/product stretch; best if positioning around technical founder execution, customer strategy, hands-on unblocking, and product judgment.

Jonathan Yu

Role Match Results | OpenAI application packet

Las Vegas, NV | JonYu3@gmail.com | 617.637.0668 | SipStudies.com | Sipopedia.com

Posting signals:

- OpenAI describes this role as the product counterpart to Deployment Engineers inside strategic customer accounts.
- The posting emphasizes product expansion, customer trust, technical blockers, integrations, MCPs, tooling, hands-on unblocking, and technical-founder style product judgment.

Resume alignment:

- Operates across product strategy, implementation, documentation, customer education, and business-value framing.
- Built a multi-surface product ecosystem rather than a single static site, including auth/paywall, AI/news, terminology, maps, journals, and events.
- Can translate field signals from sales, training, and users into product opportunities and adoption narratives.
- Has buyer-facing and strategic valuation experience around a $4.5M acquisition thesis.

APPLICATION FOLDER CONTENTS

Each role folder contains:

- Fine-tuned resume in PDF, DOCX, and Markdown
- Cover letter in PDF, DOCX, and Markdown
- 30-60-90 plan in PDF, DOCX, and Markdown

NOTES

- The Product Marketing Manager, Codex packet is included as a remote stretch option, but it has the largest formal requirement gap because the posting asks for deep technical product marketing or developer marketing tenure.
- The Customer Education and EDU Deployment Manager packets should emphasize curriculum, live teaching, assessment, credentialing, AI literacy, and adoption operations if location becomes workable.
- The AI Deployment Engineer, AI Success Engineer, and Deployed Product Manager packets should emphasize technical workflow mapping, AI-assisted building, product fluency, customer enablement, account analytics, and measurable adoption.
